

New Model Numbering System

We've simplified our model numbering system to make cabinet selection easier for you! Cabinets can now be identified by their level in the model number. See the next page for the features included at each level.

Model numbers have been shortened and pan slides have been standardized for each level:

HL1 through **HL4** have fixed wire universal pan slides as the standard

HL5 through **HL10** have adjustable stainless steel pan slides as the standard

Other pan slide types can be ordered as options.

Cabinets come in four sizes:

Models ending in "-5" are under-counter models (5 pairs of slides)

Models ending in "-8" are half size cabinets (8 pairs of slides)

Models ending in "-14" are 3/4 size cabinets (14 pairs of slides)

Models ending in "-18" are full size cabinets (18 pairs of slides)

For a quick cross-reference to the previous model numbers, see the tables below:
