PUC® Smart Order Cabinets

Features and Benefits

Carter-Hoffmann's PUC Smart Order Cabinets are ideal for your automated pick-up program. Customers order online, receive a QR code, and when they arrive, scan the code to open the door for their order. You can use PUC cabinets as free-standing units, or integrate with your POS to collect and analyze data for every order. All that is needed is a WI-FI connection.
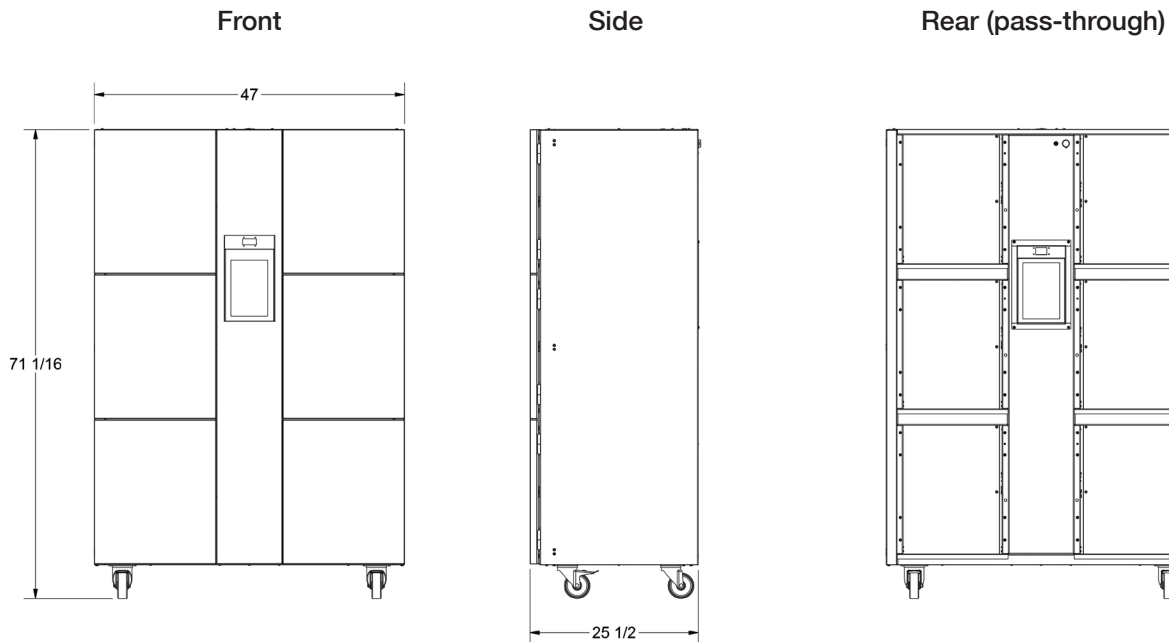

- No contact pick up
- Convenient and fast carry-out; pick-up time reduced by as much as 70%
- Labor and unnecessary touch points are minimized
- Customers' orders are accurate and safely stowed
- Add-On cabinets can be connected to master cabinets to add capacity
